

LARGEO Group of Companies has participated in the *75th Conference and Exhibition EAGE and SPE EUROPEC 2013*. The event was held from 10 to 13 June in London (UK), where were the newest developments in the field of geophysics, geology, and engineering sciences.

On the conference LARGEO Group of Companies presented poster entitled: «*Delineation of Deep Water Depositional System Elements Using AVO Attributes Analysis and Spectral Decomposition*».

Also, member of the

LARGEO Group of Companies

made ??everyday presentation on the ION-GXT booth (

LARGEO and ION-GXT

have the strategic alliance) entitled as: «Application of the modern

ION-GXT

technology for imaging in the areas with the complex geology». The presentation showed

LARGEO's experience and technical capabilities of the

ION-GXT's

software.

We are grateful to our partners, colleagues and all those, who were interest in LARGEO Group of Companies

and visited our booth and presentations.

Special thanks to those who came to our evening on the boat "Barracuda" and made ??the trip down the Thames River.

We were pleased to meet You!
