

Our qualified QC personnel are available for onshore seismic surveys to ensure effective operations and high quality of acquired data. All LARGEEO-supervisors are professionals with relevant background and not less than 5 years experience of working in diverse field conditions and familiar with most of the industry's preferred seismic and positioning data acquisition and energy source systems.

Our services include:

- Technical audits and assessment of the contractor's equipment and personnel
- Real time quality control and supervision of field operations
- Plane, geodetic and topographic land surveys
- Health, Safety and Environmental Quality Control based on international principles and performed to international standards
- In-field and QC seismic data processing
- QA/QC of electro-magnetic surveys, EM data QC
